

Aswini Kathirvel

Aspiring Generative AI Engineer | Python | LLMs | RAG | LangChain | AI Agents

✉ aswinik2608@gmail.com 📞 9486045104 📍 Chennai 🔗 LinkedIn 🐙 Github

Summary

B.Sc  . Computer Science graduate aspiring to build a career in Generative AI and AI Engineering. Possess hands-on knowledge of Python, NumPy, Pandas, Machine Learning, Deep Learning, LLMs, RAG, embeddings, vector databases, and AI agents. Familiar with technologies including LangChain, LangGraph, Pinecone, FAISS, Hugging Face, TensorFlow, and Django, along with foundational knowledge of DSA and web technologies such as HTML, CSS, and Bootstrap. Currently developing AI-powered projects to strengthen practical experience and apply Generative AI concepts to real-world problems.

Education

Bachelor of Science in Computer Science Hindusthan College of Arts & Science Percentage : 85%	2022 – 2025 Coimbatore
Higher Secondary Certificate (HSC), <i>Government Girls Higher Secondary School Perumanallur</i> Percentage : 80.1%	2021 – 2022 Tiruppur
Secondary School Leaving Certificate (SSLC), <i>Government Girls Higher Secondary School Perumanallur</i> Percentage : 75%	2019 – 2020 Tiruppur

Skills

Programming Python SQL DSA	Generative AI Prompt Engineering Large Language Models (LLMs) OpenAI API RAG (Retrieval-Augmented Generation) AI Agents Function Calling Embeddings
Frameworks LangChain LangGraph Streamlit Django	Vector Databases FAISS Pinecone
Databases MySQL	Cloud & Tools Git GitHub VS Code
AI/ML Machine Learning Fundamentals NLP	

Professional Experience

Intern — Fintech Software Solution

Contributed to AI and GenAI application development, including Python automation and LLMpowered projects. Built practical experience with the OpenAI API, LangChain, and real-world AI implementation workflows.

Certificates & Achievements

Department Topper

Secured Department Topper Certificate for outstanding academic performance.

Generative AI Training – Aimore Technologies

Completed hands-on training in Generative AI, covering Python, Machine Learning, Deep Learning, LLMs, RAG, LangChain, and related GenAI technologies.

Debugging Competition Winner

Won a competitive programming/debugging competition by demonstrating strong problem-solving and programming skills.

LeetCode & Greeks for Greeks

Solved 300+ Python coding problems.

Projects

DocMind AI — Multi-Format Document Intelligence & RAG Assistant

Tech Stack: Python, LangChain, Groq LLM, Sentence Transformers, Pinecone, PyPDF, Streamlit

- Built a **multi-format document Q&A system** using **RAG**, enabling users to upload documents and ask natural-language questions.
- Implemented **document processing, chunking, embeddings, semantic vector search, and LLM-based response generation** to provide context-grounded answers.
- Developed an interactive **Streamlit application** integrating **LangChain, Groq LLM, Sentence Transformers, and Pinecone**.

AI-Powered Resume Analyzer & Job Match Assistant

Tech Stack: Python, LLM, Groq API, PyPDF, Document Processing, Embeddings, Cosine Similarity

- Built an AI-powered application that **analyzes resumes and evaluates their relevance to a given job description**.
- Implemented **resume parsing, semantic embeddings, skill matching, and LLM-based analysis** to identify strengths, skill gaps, and improvement areas.
- Developed an interactive **Streamlit interface** for uploading resumes and generating personalized analysis and recommendations.

AI-Powered Codebase Assistan,

Tech Stack: Python, Streamlit, LangChain, RAG, Hugging Face Embeddings, Pinecone, Groq LLM

- Developed a **RAG-based code assistant** that allows users to upload Python codebases and ask natural-language questions about their source code.
- Implemented **code chunking, semantic search, and context retrieval** using LangChain, Hugging Face embeddings, and Pinecone Vector Database.
- Integrated **Groq LLM** with Streamlit to generate context-aware answers based on relevant code snippets.
